

CASE STUDY

TekStream Empowers Businesses to Make Digital Transformation to Oracle Cloud Infrastructure Powered by RackWare

Saint Gobain is a \$61 billion manufacturing organization based in France with an Abrasives Division in Worcester, Massachusetts.

Solution

TekStream worked with Saint Gobain which had been using the Oracle WebCenter Content system for 20 years. The repository held machine drawing and other mission-critical data. For performance reasons, the content management system needed to be upgraded from 11g to 12c and ported to OCI. However, the customer had a very limited IT staff and mandated that the solution be implemented in a very tight 45-day window. TekStream and RackWare met the objectives and lifted and shifted more than 8 terabytes of critical data to the cloud.

"RackWare, Inc. allows us to provide very cost-effective cloud migration solutions. Working with them, we help our customers transform their business operations by adopting flexible, high performing, digital technology."

Hardik Desai
Technical Architect and Team Lead

TekStream accelerates clients' digital transformation by navigating complex technology environments with a combination of technical expertise and staffing solutions.

RackWare provides an intelligent highly automated Hybrid Cloud Management Platform that extends across physical and virtual environments. It provides greater availability and flexibility for enterprise IT users, and reduced costs for enterprise IT providers. RackWare customers realize a cost savings of 40 to 50 percent, a reduction in time and resources by 20:1, while getting the highest performance and availability out of their cloud. RackWare is a well-established private company supporting customers from the Fortune 500 and large public agencies, around the globe.
